Dear Professor Hurley

I am submitting herewith a revised version of our paper

*“rankFD: An R Software Package for Nonparametric Analysis of General
Factorial Designs”*

for possible publication in *the R Journal*.

The paper discusses the application of novel purely nonparametric rank based methods for the analysis of general factorial designs. We addressed all of the reviewers comments and highlighted all changes made in the manuscript in blue. We believe that the paper will be a good asset for the R Journal.

The point by point response is called “PointbyPoint.pdf”. Please find it in the zip folder.

Best regards,

Prof. Dr. Frank Konietzschke
