Dear Professor Dianne Cook,

We are pleased to re-submit an original paper titled “dycdtools: an R package for Assisting Calibration and Visualising Outputs of an Aquatic Ecosystem Model” for consideration for publication in The R Journal.

The manuscript is a re-submission after addressing all the issues raised in the previous submission (2021-178). The code for the package and research reproduction has now been thoroughly checked and revised.

We appreciate your consideration of our re-submitted paper.

Sincerely,

Songyan Yu, on behalf of all authors
