Professor Catherine Hurley  
Editor in Chief  
The R Journal

Dear Professor Catherine Hurley

Thank you for the decision letter regarding our submission (RJournal 2022-95) entitled “Robust functional linear regression models” and for allowing us to revise further. Following the comments from the reviewer, we have revised our manuscript to address the reviewer’s concerns. The changes are summarised as follows.

- 1) We updated the color choices in the plots.
- 2) The figure captions were updated to provide more information about the figures.
- 3) We fixed the typo in the code file, which caused the error in the previous version.
- 4) In the manuscript, we presented the code only for one plot for a specific example and referred to the supplement code file for complete reproducible code.

Our point-by-point responses to the comments in the review reports are attached. We hope that you will find this version acceptable for publication.

Sincerely yours

Ufuk Beyaztas
