First of all, we would like to thank the Editor and Reviewers for their time to process our article and package. Second, we highly appreciate that you accepted our article.

Below, we respond to the Editor comments.

Convert article to .Rmd

> As suggested by the Editor we converted the article from pure Latex to .Rmd to make the paper more accessible to the reader using the rjtools package. Therefore, the final version of the article contains slightly different files than previous ones.

'figs' to 'img'

> due to the conversion to .Rmd we attach images with include_graphics() from the knitr package.

table justification and decimal places

> kable() from the knitr package automatically justifies right all the numeric variables and left all text variables. Moreover, we limited decimal places up to 2 as suggested.

spelling and references

> as suggested we carried out a spelling and references check throughout the text.

figure caption expansion

> figure caption expanded as suggested by the editor and the link below:
https://rjournal.github.io/rjtools/articles/format-details.html#figures
