Thank you for reviewing our paper in detail and tentatively accepting our paper. We read the reviewers' comments carefully and followed them for our revision.

I prepared a revised version of "nlmeVPC: Visual Diagnosis for the Nonlinear Mixed Effect Model" (Rjournal 2022-52) and a point-by-point response to the reviewers' comments. The detailed answers to the reviewers' comments are in the "ResponseToReviewers.pdf." We also revised our package nlmeVPC (version 2.6) and resubmitted it to CRAN (https://cran.r-project.org/web/packages/nlmeVPC/index.html).

I appreciate your consideration of our manuscript.

Sincerely,
